DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement (IDS) submitted on 6/11/2002 has been considered by the examiner.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

3. Claims 1-20 are rejected under 35 U.S.C. 102(a) as being anticipated by Windecker et al. (Circulation, August 21, 2001; 104:928-933). Windecker et al. disclose TiN_xO_y compound and method as claimed for coating a stent (see the whole document).

4. Claims 1-6, 8-16, 18-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Lazarov et al. (6,110,204).

Lazarov et al. disclose TiN_xO_y compound and method as claimed for coating an implant such as stent (see the whole document).

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. Claim 7 and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lazarov et al. '204. Although, Lazarov et al. do not disclose the stent being made from stainless steel, stainless steel is a well-known material in the art to make stents and implants. Therefore, it would have been obvious to one having ordinary skill in the art to make Lazarov's implant such as stent from stainless steel. Doing so would amount to mere substitution of one material for another within the same art that would perform equally well in Lazarov's implant such as stent.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Machek et al. (5,954,761) disclose a stent and a Titanium Nitride coating. Brenner et al. (6,231,956) disclose method for coating a wear-resistant component with a titanium Nitride. KenKnight et al. (6,519,488); Good (6,099,457) and Jalisi (6,520,923) disclose a stent and a Titanium Nitride coating.
